

Empowering the farms...

CENTRAL BIOTECH PVT. LTD.

(An ISO 9001:2015 Certified Company)

Central Biotech Group of Companies

- **Central Biotech Pvt. Ltd.**
- **Encon Organic Pvt. Ltd.**
- **Encon Polymers Pvt. Ltd.**

About Us

Central Biotech Group of Companies

Established in 1999, the Central Biotech Group of Companies is a diversified and innovation-driven organization headquartered in Central India, with over 25 years of experience in delivering high-quality products and solutions across agriculture, animal nutrition, and industrial packaging sectors.

Our group comprises three key companies: Central Biotech Pvt. Ltd., Encon Organics Pvt. Ltd., and Encon Polymers Pvt. Ltd., each contributing uniquely to their respective industries.

Central Biotech Pvt. Ltd. is our flagship company, recognized as a leading manufacturer of hydrolyzed proteins for food, feed, and agrochemical applications. Our food and feed-grade protein range includes Soya Protein Isolate, Hydrolyzed Soy Protein, and Collagen Protein, catering to both domestic and international markets.

We are proud to be Central India's largest manufacturer of hair-derived protein (keratin), widely used in the agrochemical industry to develop highly effective plant growth-promoting products. Additionally, we are a top producer of EDTA chelated micronutrient fertilizers, manufactured to world-class standards to support sustainable farming practices.

Our product portfolio also includes a wide range of plant growth promoters, water-soluble fertilizers, and pesticides that help enhance crop yields by up to 35-45%, delivering tangible benefits to the farming community.

Encon Organics Pvt. Ltd. focuses on the production of high-quality veterinary feed supplements, including glycines, methionines, and proteinates, formulated to support optimal animal health and productivity.

Encon Polymers Pvt. Ltd. specializes in HDPE and PET-based products, meeting the growing demands of industrial and commercial packaging applications with a strong commitment to quality and reliability.

At the core of our operations is a robust in-house Research and Development facility, enabling continuous innovation and the development of cutting-edge products. With our large-scale manufacturing capacity, we are well-positioned to meet the ever-increasing market demand across all our business verticals.

Driven by quality, innovation, and customer satisfaction, the Central Biotech Group of Companies is committed to creating sustainable solutions that empower farmers, improve animal health, and support industrial progress.

Hydrolysed Proteins

Powering Nutrition, Growth, and Performance

At Central Biotech Pvt. Ltd., we specialize in the production of high-quality hydrolysed proteins, engineered for diverse applications across the food, feed, agrochemical, and nutraceutical industries. Our state-of-the-art processing ensures optimal amino acid availability, digestibility, and bioactivity.

● Soya Protein Isolate

Our Soya Protein Isolate is a highly refined, plant-based protein with over 90% protein content, making it ideal for food and feed formulations. It is rich in essential amino acids, highly digestible, and free from cholesterol and lactose, making it a preferred choice for health-conscious consumers and animal nutrition programs alike.

● Hydrolysed Soya Protein

Hydrolysed Soya Protein is enzymatically broken down to release short-chain peptides and free amino acids. It offers excellent solubility and quick absorption, making it valuable in agriculture as a biostimulant, and in animal feed to boost growth and recovery. It also acts as a natural chelating agent in micronutrient formulations.

● Collagen Protein

Our Collagen Protein, is a rich source of glycine, proline, and hydroxyproline, which are critical for tissue regeneration and joint health. Globally recognized for its use in human health supplements, collagen supports skin elasticity, bone strength, and muscle maintenance. It also plays a vital role in veterinary and feed nutrition.

● Hydrolysed Hair Protein (Keratin)

We are Central India's largest producer of Hydrolysed Hair Protein (Keratin), renowned for its high amino acid concentration and superior biological activity. Widely used in agrochemical formulations, it promotes root development, flowering, and overall plant vitality. Its nitrogen-rich composition makes it a powerful natural stimulant for plant growth.

"Grow Better with Chelated Micronutrients"

A) Micronutrient Mixture Fertilizers

Nutrox

(EDTA Chelated micronutrient mixture fertilizer)

Micronutrients play an active role in the plant metabolism process, starting from cell wall development to respiration, photosynthesis, chlorophyll formation, enzyme activity & nitrogen fixation & reduction etc. When these nutrients are marginally deficient, the plant suffer & does not produce any visible signs of hunger but it's productivity goes down. A farmer must ensure that his crop is not suffering from hidden hunger; otherwise he will get less yield.

Nutrox is the most effective source for correcting micronutrient deficiencies, ensuring better & balanced nutrient supply. Nutrox contains all micronutrients in "Chelated" form. As the micronutrient ions are perfectly chelated, nutrient losses by fixation are negligible. Nutrox, a research based product provides all the micronutrients to the plant without any losses.

Packing available – 1 kg, 500 g, 250 g, 100g

Doses - 750 g / ha

Micron

(Amino Acid chelated micronutrient mixture fertilizer)

Micron, an amino acid chelated micronutrient mixture provides essential plant nutrients such as Zinc, Iron, Manganese, Copper, Boron & Molybdenum. In addition it also contains all essential amino acids required for healthy growth of plants. Micronutrients chelated with amino acids are easily absorbed by the plant system ensuring better & balanced nutrition.

Packing available – 1 kg, 500 g, 250 g, 100g

Doses - 750 g / ha

Vigour

Vigour, is EDTA chelated micronutrient mixture fertilizer. It provides essential plant nutrients such as Zinc, Iron, Manganese, Copper, Boron & Molybdenum. In addition it also contains all essential amino acids & Fulvic acid required for healthy growth of plants. It is used for enhancing the yield of all agriculture & horticultural crops.

Vigour improves uptake of NPK & macro nutrients. It reduces flower drop and helps in uniform fruiting leading to better quality of fruits.

Packing available – 1 kg, 500 g, 250 g, 100g

Doses – 750 g / ha

Phytocare Racer

(Liquid Micronutrient Mixture Fertilizer with Amino Acids)

Phytocare Racer is a unique combination of Micronutrients & all 16 essential Amino acids. It has multiple effect of correcting the micronutrient deficiencies & supplying all amino acids to boost up plant health. Micronutrients chelated with amino acids are easily absorbed by the plant system ensuring better & balanced nutrition. In addition, amino acids help to develop health & vigour of plants resulting increased yield.

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml & 100 ml

Doses – 1.5 Ltr/ha (Foliar Spray)

Microgold

(Chelated MMF liquid)

Microgold is a liquid formulation supplying essential micronutrients such as zinc, iron, manganese, boron & molybdenum in predetermined proportions for balanced nutrition of plants.

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml

Doses – 1500 ml. / ha (Foliar Spray)

Phytocare

Phytocare, a research based product, provides essential plant nutrients such as zinc, iron, manganese, copper and boron in predetermined proportions.

Phytocare is formulated for soil application. We manufacture different grades of micronutrient mixture as per notification of various state governments in India.

Packing available –

Phytocare ZINC HIGH - 5 kg, 10 kg, 50 kg

Doses – 25 kg /ha (Soil application)

B) Straight Micronutrient Fertilizers

- 1) Zinc EDTA - Zn- 12% min
- 2) Ferros EDTA - Fe-12% min
- 3) Magnesium EDTA - Mg 5% min
- 4) Calcium EDTA - Ca- 9% min
- 5) Manganese EDTA - Mn-12% min
- 6) Copper EDTA - Cu-12% min

Zeron (Zinc EDTA -Zn-12%)

Zeron, the 100 % chelated Zinc, with EDTA, is the most effective source to correct zinc deficiency of all crops. Being chelated it is easily absorbed by the plants. **Zeron**, when used as soil application or foliar spray, the plant system absorbs zinc very quickly. Zeron is superior to all other forms of zinc sources, as it minimizes the danger of being fixed in the soil. Zeron improves crop production as much as major nutrient do. Zeron is involved in synthesis of some amino acids & auxins. It is vital for oxidation process in plant cells & improving the content of protein, tannin, sugar & lipids in plants & seeds.

Packing available – 1 kg, 500 g, 250 g, 100g
Doses - 750 g / ha

Glorious (Magnesium EDTA- Mg- 5%)

Glorious, the 100% chelated magnesium with EDTA is the most effective source to correct magnesium deficiency of all crops.

Packing available - 500 g, 250 g
Doses - 750 g/ha

Ferron (Fe- EDTA - Fe -12%)

Ferron, the 100 % chelated Iron, with EDTA, is the most effective source to correct Iron deficiency of all crops. Being chelated it is easily absorbed by the plants. Ferron, when used as soil application or foliar spray, the plant system absorbs Iron very quickly. Ferron is superior to all other forms of Iron sources, as it minimizes the danger of being fixed in the soil.

Packing available – 1 kg, 500 g, 250 g, 100g
Doses - 750 g / ha

Swing

Boron (D.O.T.-20% Boron)

Swing Boron, chemically, Disodium octaborate tetrahydrate, is a highly concentrated & completely water soluble source of boron. It contains 20 % boron. Swing Boron is the easiest way to overcome boron deficiency of crops.

Packing available – 1 kg, 500 g, 250 g

Doses – 1 kg/ha (Foliar Spray)

Super Zinc

SuperZinc is a high-efficiency Zinc Oxide Suspension (SC) containing 39.5% zinc in nano-particle form. The nano-size enhances absorption and mobility within the plant, making it more effective in correcting zinc deficiency. SuperZinc supports root development, boosts chlorophyll production, and improves overall plant health and yield. Ideal for foliar and soil application across all crops.

Packing available – 1Ltr, 500ml, 250ml

Doses – 750 ml/ha

Calmax

Calmax is a premium liquid calcium fertilizer, formulated using high-purity, food-grade calcium chloride to ensure maximum crop safety and effectiveness. Designed for easy mixing and application, Calmax improves fruit quality, strengthens cell walls, and reduces physiological disorders caused by calcium deficiency. Its non-corrosive nature protects spray equipment, while its superior purity ensures safe use on a wide range of crops without compromising market value. Calmax is the trusted choice for growers seeking better yields and healthier produce.

Packing available – 5 Ltr, 1Ltr, 500ml

Doses – 1.5Ltr/ha

"Boost Growth, maximise yield"

Plant Growth Promoters

Racer

(PGR based on amino acids)

Racer is a high-performance plant growth promoter made from keratin extracted from human hair, rich in all essential amino acids and 14-18% L-Cysteine. L-Cysteine boosts chlorophyll formation, stress tolerance, and nutrient uptake. Unlike common amino acid products from animal waste, Racer offers pure, plant-ready proteins that enhance root growth, flowering, and yield. Its unique formulation ensures better performance and longer-lasting effects, making it ideal for high-efficiency farming.

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml & 100 ml

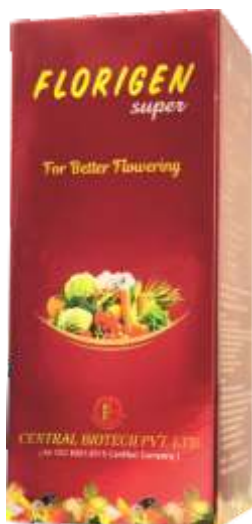

Doses – 1.5 Ltr. / ha (Foliar Spray)

Aminola

Aminola is a concentrated amino acid formulation containing 85% pure amino acids, designed for foliar and drip application. It enhances nutrient uptake, stimulates plant metabolism, and promotes faster growth and recovery from stress. Aminola supports flowering, fruit set, and overall crop health, making it ideal for boosting productivity in all crops.

Packing available – 1 kg, 500 g

Doses – 1.5 kg/ha

Florigen Super

Profuse Flowering • Better Fruit Set • Higher Yield

Florigen is a powerful biostimulant specially formulated to boost flowering and fruit setting in crops. It contains a perfect combination of 20 amino acids, along with auxins, cytokinins, and gibberellins that work in harmony to shift the plant's focus from vegetative to reproductive growth.

This physiological shift leads to profuse flowering. The 20 amino acids in Florigen then act as a vital energy source, helping plants convert more flowers into fruits-resulting in increased yield and productivity.

Florigen - For Flowering That Delivers Results.

Packing available – 1 Ltr, 500ml, 250ml, 100ml, 50ml, 15ml

Doses – 500-750 ml / ha (Foliar Spray)

Mahasamrat

Mahasamrat is a powerful biostimulant useful for fast vegetative growth, in early growth stages of crops. Mahasamrat also accelerates profuse flowering resulting in increased yield. It contains all necessary amino acids & plant hormones in a balanced form. It activates cell division & multiplication process.

Packing available – 1 Ltr, 500ml, 250ml, 100ml, 50ml, 15ml

Doses – 500-750 ml / ha (Foliar Spray)

Express

Express is a powerful biostimulant that supplies all essential 16 amino acids, & plant hormones & nutrients for enhanced yield. It is useful for all Agricultural, Horticultural, Floricultural crops. Express is suitable for organic farming.

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml

Doses - 500-750 ml/ha (Foliar Spray)

"Deep Roots, Strong Shoots"

Costal

(Concentrated Potassium Humate)

Costal is an organic product based on humic acids. It is the end product of microbial degradation of plants & animal debris & is one of the most important constituents of fertile soil.

Costal stimulates root & shoot growth & improves the uptake of phosphate & micronutrients from soil. It acts as a chelating agent, growth stimulants, catalyst & buffer, against complicated soil conditions affecting plants.

Packing available - 1kg, 500 g, 250 g, 100 g,

Doses - 1.5 kg/ha

Phytohume

Phytohume is a liquid formulation containing 12 % humic acids and fulvic acid , designed to improve soil health and nutrient availability. It enhances root development, increases microbial activity, and improves water retention in the soil. Suitable for all crops, Phytohume boosts plant vigor and supports better yield by promoting healthier soil-plant interactions

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml

Doses - 1.5 Ltr/ha

Dewdrops

(Technical Spreader)

Dewdrops is a strong Technical Spreader which is useful in every spray of pesticides & fertilizers. It improves dispersing & spreading quality of spray, ultimately improved efficacy.

Packing available – 5 Ltr, 1 Ltr, 500 ml, 250 ml, 100 ml

Doses - 500-750 ml/ha

Fresh

(Silicon based spray adjuvant)

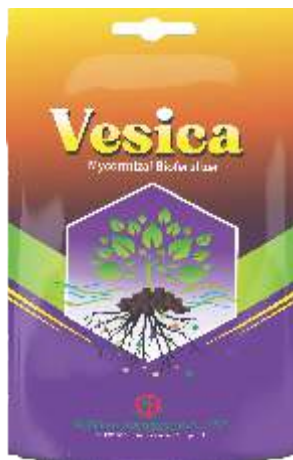

Fresh is a silicone based super spreader, activator. Being **non-ionic** it can be used with a broad range and agrochemicals (Insecticides, Fungicides, Herbicides) and Plant growth promoters.

Benefits of Fresh :

- 1) Super spreading :** Fresh solution spreads quickly, carrying insecticide into the inaccessible site inhabited by pest and carrying fungicide on those crop canopy prone to infection by diseases. It assists herbicides to kill weeds uniformly and in shorter duration.
- 2) Super Sticking :** To improve coverage and retention of pesticide on foliage.
- 3) Improve Rainfastness :** Due to high and quick uptake, the solution doesn't wash off even after immediate rain.

Packing available – 500 ml, 250 ml, 100 ml, 50 ml, 25 ml

Doses - 100 ml/ha (Foliar Spray)

Nature's Root Power

Vesica

(Mycorrhiza-Based Organic Biofertilizer)

Vesica is an advanced bio-product powered by mycorrhizal fungi, designed to boost crop yield organically without harming the soil.

Key Benefits :

- Increases yield by 30-40% through enhanced nutrient and water absorption
- Improves soil health by supporting beneficial microbes and organic matter
- Reduces chemical fertilizer use by unlocking natural nutrients
- Enhances root growth and plant resistance to stress and soil-borne issues
- 100% organic & eco-friendly, safe for soil, water, and long-term farming

Ideal for all crops - cereals, vegetables, pulses, fruits, and more.

Packing available – 4 kg

Dose - 1) Vesica Granules 10 kg / ha.
2) Vesica water soluble formulation for drip 250g/ha

Aquagro

(Liquid Biofertilizer Consortia)

A powerful blend of beneficial microbes for soil and crop health

Aquagro is a liquid biofertilizer containing a synergistic mix of:

Azotobacter - Fixes atmospheric nitrogen

Rhizobium - Forms nodules in legume roots to fix nitrogen

Phosphate Solubilizing Bacteria (PSB) - Makes insoluble phosphorus available to plants

Potash Solubilizing Bacteria (KSB) - Mobilizes potash from the soil for better plant uptake

How It Works :

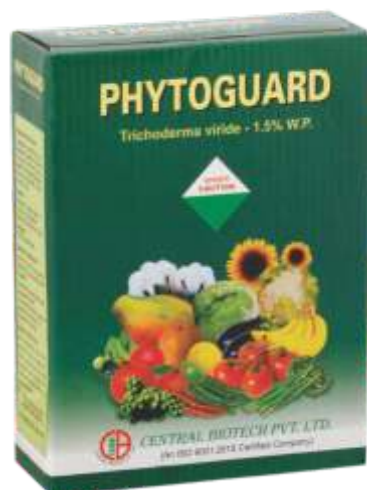

These beneficial microbes colonize the root zone, enhance nutrient availability, and stimulate root growth, resulting in stronger plants, better yields, and improved soil health.

Key Benefits :

- 1) Organically boosts yield by 20-30%
- 2) Reduces chemical fertilizer needs
- 3) Improves soil microbial balance
- 4) Suitable for all crops via drip or soil drenching.

Packing available - 1 ltr, 500 ml

Dose - 2.5 ltr/ha

Phytoguard

(Trichoderma viride-based Biofungicide)

Natural Shield Against Fungal Diseases

Phytoguard is a broad-spectrum biofungicide containing Trichoderma viride, a beneficial fungus that protects crops by suppressing harmful soil-borne pathogens like Fusarium, Rhizoctonia, Pythium, and Sclerotium.

How It Works :

Trichoderma rapidly colonizes the root zone, outcompeting and destroying disease-causing fungi through:

- Mycoparasitism (attacking harmful fungi)
- Antibiosis (releasing antifungal compounds)
- Competition for nutrients and space

Key Benefits :

- Controls root rot, damping-off, and wilt diseases
- Promotes healthy root growth and plant vigor
- Improves soil microbial balance
- Safe for soil, crops, and the environment
- Ideal for organic and integrated disease management
- Application: Seed treatment, soil application, or drip irrigation for all crops.

Packing available - 1 kg 500g, 250g

Dose - 2.5 kg/ha

Water soluble NPK fertilizers

Water soluble NPK fertilizers, used as a foliar spray & drip fertigation, are the most efficient & readily available source of major nutrients for plants. These are quickly absorbed by the plants & are superior to the fertilizers applied through soil. We had developed & produced following 100 % water soluble NPK fertilizers.

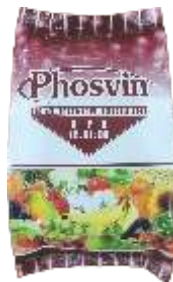

Regain

NPK-19:19:19

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Phosvin

NPK-12:61:00

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Protect

NPK-13:00:45

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Prosper

NPK- 00:00:50

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Esteem

NPK- 13:40:13

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Alliance

Calcium Nitrate

Ca-18.8% : N-15.5%

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha

Promote

NPK- 00:52:34

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha (Foliar Spray)

Composite

Ferrous Ammonium Sulphate

Fe-11% : N -5%

Packing available – 1 kg, 5 kg, 25 kg

Doses – 2.5 kg /ha

ENCON ORGANIC PVT. LTD.

A Central Biotech Group Company

Encon Organics Pvt. Ltd. is a prominent manufacturing company under the Central Biotech Group, focused on delivering high-quality veterinary feed supplements to support animal health and performance. With a strong commitment to scientific innovation and quality, Encon plays a vital role in enhancing the nutritional value of animal feed for livestock and poultry industries.

Our core product range includes :

- **Metal Glycinates**
- **Methioninates**
- **Proteinates**
- **Multi Micronutrient Mixtures**

These supplements are specially formulated using advanced chelation technology to ensure high bioavailability, better nutrient absorption, and superior animal health outcomes. Whether it's improving growth, immunity, reproductive health, or feed efficiency, Encon's products are trusted by veterinarians, nutritionists, and feed manufacturers across the industry.

As part of the reputed Central Biotech Group, we uphold the values of quality, consistency, and customer satisfaction, delivering innovative solutions that meet the evolving needs of modern animal nutrition.

Encon Organics Pvt. Ltd. - Advanced Nutrition for Healthier Animals

1 Metal Glycinates (Chelated with Glycine for High Bioavailability)

Zinc Glycinate
Copper Glycinate
Manganese Glycinate
Iron (Ferrous) Glycinate
Magnesium Glycinate
Calcium Glycinate
Cobalt Glycinate
Selenium Glycinate (Organic Selenium Source)

2 Methionates (Chelated with Methionine - Ideal for Performance & Reproduction)

Zinc Methioninate
Copper Methioninate
Manganese Methioninate
Iron (Ferrous) Methioninate
Selenium Methioninate (Organic Selenium)

3 Metal Proteinates (Chelated with Hydrolyzed Proteins/Amino Acids)

Zinc Proteinate
Copper Proteinate
Manganese Proteinate
Iron Proteinate
Cobalt Proteinate
Magnesium Proteinate
Calcium Proteinate

4 Multi-Mineral Mixtures / Veterinary Mineral Premixes Trace Mineral Mixture (Customized Formulations)

Chelated Mineral Mixture (for Poultry, Cattle, Aqua)
Calcium + Phosphorus + Vitamin D3 Blend
Milk Booster Mineral Mix (for dairy cattle)
Growth Promoter Mineral Mix (for calves & poultry)
Reproductive Health Mineral Mix (Breeding Support)
Electrolyte + Mineral Blend (for dehydration & stress recovery)

Encon Polymers Pvt. Ltd.

A Central Biotech Group Company

Encon Polymers Pvt. Ltd. is a specialized manufacturing unit under the Central Biotech Group, engaged in the production of high-quality HDPE and PET bottles. With a focus on precision, hygiene, and durability, we cater to the packaging needs of a wide range of industries with customized and reliable solutions.

Industries We Serve :

- Agrochemicals
- Food and Beverages
- Pharmaceuticals
- Cosmetics and Personal Care
- Veterinary and Animal Health
- Household and Industrial Chemicals
- Nutraceuticals and Herbal Products
- Lubricants and Oils

Our state-of-the-art manufacturing facility ensures that every bottle meets strict quality standards in terms of strength, safety, and compliance. We offer a wide variety of shapes, sizes, and closures to meet the unique requirements of different sectors. As part of the trusted Central Biotech Group, Encon Polymers stands for quality packaging solutions, timely delivery, and customer satisfaction.

Encon Polymers Pvt. Ltd. - Shaping Reliable Packaging for Diverse Industries

Fertilizers for bulk supply

	Amino acid 65%
	Amino acid 85%
	Amino acid 95%
	Hair Protein (Liquid) 45%
	Hair Protein (Liquid) 65%
	100% Chelated Micronutrients mix fertilizer (Chelated with EDTA) Customised Grades as per requirement.
	100% EDTA Chelated micronutrient mixed fertilizer with Amino Acid & Fulvic Acid. Customised Grades as per requirement.
	Micronutrients mix fertilizer (Chelated with Amino acid) Customised Grades as per requirement.
	Ferrous EDTA 12 %
	Copper EDTA 12 %
	Zinc EDTA 12 %

Fertilizers for bulk supply

	Zinc oxide 39.5% SC
	Calcium EDTA - Ca 9 %
	Magnesium EDTA - Mg 5 %
	NPK - 19:19:19 (100% Water Soluble Fertilizer for Foliar Spray & Drip Irrigation)
	NPK - 13:40:13 (100% Water Soluble Fertilizer for Foliar Spray & Drip Irrigation)
	Manganese EDTA - Mn-12 %
	EDTA Chelated Calcium- 6% + Boron- 5.5%
	Super Potassium Humate Shiny flakes (Humic Acid 65% Fulvic Acid- 15%, k20- 10.41%
	Mycorhizza Technical (33000-35000 propagules per gram)
	Liquid Calcium- Ca-11%
	Silicon Based Super spreader

Crop Protection Division

Under our crop protection division, we are manufacturing world class pesticides for crop protection. While formulating these products intensive care is taken to produce best quality products of higher purity & efficacy. Modern formulation science technology gave birth to newer molecules of pesticide additives, emulsifier & adjuvants. All these advanced inventions helped us to formulate better quality pesticides.

Sr. No.	Trade Name	Herbicide
1	Action	"2,4-d Amine Salt 58% SL"
2	Complex	"2,4-d Ethyl Ester 38% EC"
3	Rider Gold	Ammonium Salt of Glyphosate 71% SG
4	Pyraxin	Bispyribac Sodium 10% (w/v) SC
5	Agritox	Glufosinate Ammonium - 13.5% SL
6	Rider	Glyphosate 41% SL
7	Parachute	Imazethapyr 10% SL
8	Oxyvel	Oxyflourfen 23.5% EC (w/w)
9	Gradient	Topramezone 33.6% SC

Sr. No.	Trade Name	Plant Growth Regulators
1	Blossom	Chlormequat Chloride 50% SOL
2	Boost	Gibberelic Acid 0.001% L
3	Gibberlin	Gibberellic Acis 0.186% SP
4	Folitra	Paclobutrazol 40% SC
5	Marlin	Triacantanol EC 0.05%
6	Marlin Ultra	Triacantanol EW 0.1%
7	Tricon-g	Triacantanol GR 0.05%
